

THE LAST FIVE YEARS · THE SECOND SCREEN

The Cue Bible

build-2026-08-27P · how phones work

187 cues · 14 songs · generated from the live show build, so this document cannot drift from what the phones actually do

THE STANDING RULE (new in 27L): the phone behaves exactly like a real phone. Tapping a notification IS the unlock — the app opens directly, no home screen. Inboxes and message lists load whole the instant the app opens, and a full life continues past the bottom edge of the glass. Only what would genuinely arrive right now — a text, a notification, new mail — appears live, and new mail lands at the top. Anything that violates this is a bug, even if it would make a nice theatrical beat.

How to read each entry: the header gives the cue ID, which screen, whose phone, the app, and the musical anchor. ON SCREEN is the complete content, verbatim and untruncated. PLAYS covers mechanics the engine performs on its own — navigation, self-timed animation, synthesized sound. PHONES gives the state after the cue when it changed. Gold notes carry dramaturgy, holds, and open director choices.
